About Me

In past - seaman. Worked on Car and Bulk carriers. Carried a variety of goods (from timber and cars to electric windmill blades) to parts of the world (Nigeria to America and Canada), worked with many nationalities in fully mixed crews.

Now: I'm a hard-working and highly proficient Front-End Developer focused on web development, understanding of local development environments and integration of varying components. Ability to work efficiently independently with minimum supervision. I have creative thinking and high attention to detail. Can easily adapt to any technology required for projects.

More than 10 years of experience in merchant shipping as an Officer formed in me a good understanding that persistence and stable work lead to good results.
